

Consent to perform Anesthesia, Pre-Operative Lab Tests, and Medical Procedure(s)

Pet's name _____

The medical Staff at Redwood Veterinary Hospital has made every effort to ensure that your pet has a smooth and safe anesthesia and surgery/procedure.

We use the safest anesthetic protocols available for your pet, but because no anesthesia is without some risk, our doctors recommend a pre-anesthetic blood screen for all patients undergoing anesthesia. *We ask that all clients admitting a pet for general anesthesia approve or decline this procedure below.*

The pre-anesthetic blood screen is performed in our in-house lab. It enables the doctor to better assess anesthetic risk and/or prescribe intra-operative supportive measures to help ensure the safety of your pet.

PRE-ANESTHETIC BLOOD SCREEN: APPROVE DECLINE

I am the owner, or agent of the owner, of the animal named above. I understand the risks of anesthesia and surgery for my pet and authorize the doctor proceed with the surgery/procedure as discussed.
